220V is 220V, it does not make any difference how you get it. What COULD be a problem is the frequency but if your pump is 60Hz, then you should be OK. Only a minority of electrical motors can run on both 50 as well as 60Hz, so be careful. Running a motor designed for 50Hz (Europe, Africa) on 60Hz (Philippine, USA) you can get a burnout pretty fast.
