XL1200 Waverunner review

Re: 98 XL 1200 waverunner engine rebuild I just rebuilt my 760 engine after I had a crank bearing seize on me. I replaced my crank, pistons and rings, and had my cylinders honed for about \$550. I didn't what to go the rebuild route because I wanted to use my own block and head, wanted to pick my own parts, and know how it was done.

Ok, so here is my story.I just purchased a 1999 Yamaha Waverunner 1200 XL Limited off of craigslist. The guy said it ran great and it only has 77 hours on it. Paid \$3400 for it with the trailer and cover. Got it home and took it out about a week later to test it out. I got up to about 5000 rpms and it was going 17 mph, so I took it back to the dock.

Re: 98 Yamaha XL1200 vibration I make a routine of checking motor mounts every time I go

out,, broke so many of them jumping wakes,, grab the engine and pull on it to see if it moves, do it from both sides, a bad mount will show and the motor will move , good mounts the motor will be really solid in place.

Can anybody out there with long term experience with the xlt1200 engine tell me what can be expected as far as engine life is concerned? That would be starting with a quality rebuild and taking all necessary precautions with the power valves, oil lines etc. Replies from those with real life experience are much appreciated. Thanks, Gary.
