Quotes about Sakurai . For me personally, J. J. had long been far more than just a particularly distinguished colleague. It saddens me that we will never again laugh together at physics and physicists and life in general, and that he will not see the success of his last work. But I am happy that it has been brought to fruition.

j] (along with [S i,S j]=[S j,S i]) and the six for {S i,S j} (along with {S i,S j} =+{S j,S i}). 9. From the figure $\hat{n} = \hat{i}\cos\alpha\sin\beta + \hat{j}\sin\alpha\sin\beta + \hat{k}\cos\beta$ so we need to find the matrix representation of the operator $S \cdot \hat{n} = S_x \cos\alpha\sin\beta + S_y \sin\alpha\sin\beta + S_z \cos\beta$. This means we need the matrix representations of S_x , S_y , and S_z ...

Modern Quantum Mechanics - J. J. Sakurai, Jim Napolitano ...

J. J. Sakurai was always a very welcome guest here at CERN, for he was one of those rare theorists to whom the experimental facts are even more interesting than the theoretical game itself. Nevertheless, he delighted in theoretical physics and in its teaching, a subject on which he held strong opinions.
