How the Internet was born - lynda.com

How the Web Was Born, by CERN's James Gillies and Robert Cailliau, follows the trail from the dawn of ARPANet through the mid-90s, just as the Web boom was beginning to take off in earnest. That may seem like

an odd ending point, but the post-1995 story has already been told ad nauseam, and the writers know how to quit while they're ahead.

9780192862075: How the Web was Born: The Story of the ...

The terms Internet and World Wide Web are often used without much distinction. However, the two terms do not mean the same thing. The Internet is a global system of interconnected computer networks. In contrast, the World Wide Web is a global collection of documents and other resources, linked by hyperlinks and URIs.

World Wide Web - Wikipedia

For a start the Web is not the Internet and if you can see the difference between the two, then the book gets very clear. The Web was created as one communications service which could use the internet, by a group in CERN (a nuclear research facility) in Switzerland.
