Both the systems are used for cost calculation and attachment of cost to each unit completed, but both the systems are suitable in different situations. The basic difference between job costing and process costing are Basis of Distinction Job order costing Process costing 1.

Chapter-1 to 3 - Mu

Process costing Process costing is a method of costing used mainly in manufacturing where units are continuously mass-produced through one or more processes. Examples of this include the manufacture of erasers, chemicals or processed food. In process costing it is the process that is costed (unlike job costing where each job is costed separately).

RELEVANT TO FOUNDATIONS IN ACCOUNTANCY PAPER FMA ...

The last section provides a short discussion of normal historical, full absorption, process costing in relation to the four functions of an information system outlined in Chapter 2. CONCEPTS AND TERMINOLOGY IN PROCESS COSTING. As described in Chapter 2, process costing means that costs are accumulated by departments, operations, or processes.
