A pulley is a simple machine consisting of a wheel turning on an axle. Pulleys are often used singly and in combinations to do work. If energy is conserved for a machine, then the work done by the machine must be equal to the work put into the machine: Work out = Work in

Physics Lab - The Pulley as a Simple Machine
In the Pulleys Gizmo, students can see how the effort of one person can be multiplied by adding more fixed and moveable pulleys to a system, allowing even a single person to lift a heavy object. They will also see why this happens, as each rope in the system adds to the total force acting on the object.
