However, the next revolution, in energy, is already underway. While the drop in price for fossil fuels has grabbed most of the headlines lately, ...

How The Energy Revolution Will Transform How We Live and Work

Traditional fossil energy is not renewable, while renewable non-fossil energy resources will complete the “ultimate revolution” on conventional energy. If it is acknowledged that the oil industry has a development cycle of 300 years, it has been 150 years from the starting of the world oil industry in 1859, and now the remaining 150 years may be the life cycle of fossil energy.

Energy revolution: From a fossil energy era to a new ...

Before the industrial revolution, our energy needs were modest. For heat, we relied on the sun—and burned wood, straw, and dried dung when the sun failed us. For transportation, the muscle of horses and the power of the wind in our sails took us to every corner of the world.
