installation requirements for various oil and gas infrastructure such as pipelines, subsea equipment, vessels, and tanks. With the continued increase in available natural gas ready to export — especially LNG — and the definition of “ deepwater ” changing every year, an understanding of thermal insulation is more critical than ever.

Thermal Insulation Handbook for the Oil and Gas Industries ...

Thermal insulation materials fall into the latter category. Thermal insulation materials may be natural substances or man-made. If the density of insulation is low, the air or gas voids are comparatively large and this makes for the best insulation for low to medium temperatures where compression and/or vibration is not a factor.
